FACA Committee Membership (and Situation Assessment/Convening Report)

- Required by statute (FACA, NRA)
- The Committee is comprised of representatives of the various interests with a definable stake in the outcome of the proposed requirements. The EPA Administrator will select members carefully to ensure that there is a balanced representation of such interests on the Negotiated Rulemaking Committee. EPA anticipates that the Negotiated Rulemaking Committee will contain representatives from industry, environmental groups, and state, local, and tribal governments.
- The Situation Assessment (a.k.a. Convening Report) identifies the initial issues for negotiation, provides background information from all parties, and proposes committee membership. It is developed by an independent assessor (the facilitators) based on interviews with EPA and parties identified by EPA, as a result of the *Intent to Negotiate FRN* (published in Dec 2016), or by others (e.g., through the interview process). The Situation Assessment is the facilitator's product.
- Reviews: Workgroup (including OGC and OP), OPPT divisions, OPPT IO, OCSP IO, the parties interviewed, and FACMD (Committee Membership only)
- Status: Currently in OA, for approval
